### Sercel sells a WiNG land nodal acquisition system to Paragon Geophysical Services in USA

Sercel has announced the sale and delivery of a **WiNG** wireless land nodal seismic acquisition system to Paragon Geophysical Services, Inc.

Paragon selected Sercel's latest nodal technology to conduct high-production seismic surveys across the USA and to provide their clients with the most accurate seismic acquisition data. This is achieved through the key advantages of WiNG's System-Certified Data delivery and the proven high performance of Sercel's **QuietSeis**<sup>®</sup> broadband digital sensor.

John H. Beury III, Paragon's CEO/Owner, said: "Paragon has always believed in providing its clients with the latest technology. Sercel remains "ahead of the curve", complementing Paragon's model of excellence and dedication, which enhances our mutual commitment to providing precision seismic acquisition data."

Emmanuelle Dubu, Sercel CEO, said: "We are pleased to announce our delivery of a WiNG land nodal acquisition system to Paragon Geophysical Services, a company with which we share the same spirit of technological innovation and dedication to customer service. The digital era is finally becoming a reality in land seismic acquisition and we look forward to it continuing to gain momentum in the future."

### About Sercel

Sercel is the world's leading designer and manufacturer of innovative seismic equipment and reservoir monitoring instruments. Sercel provides oil field service companies and geophysical contractors with the widest range of leading-edge technologies for exploration in land, marine, ocean bottom, transition zone and reservoir environments. Employing more than 1,500 people worldwide, Sercel's main sales offices are located in Houston (USA) and Nantes (France). More information about Sercel is available at [www.sercel.com](http://www.sercel.com).
